

Presentations

Basics

- Approximately 5 to 10 minutes long
- No prescribed method of presentation - be as creative as you want
- Talk to me well in advance if you need – DVD player, VCR, power point projector
- Attendance is mandatory
-

FAQ

1. What should I present?

You may present whatever you wish. However, your project is supposed to research a problem – your presentation should explain how you went about that and what your results were.

2. How should I present?

You may present however you want. You want to capture and hold the attention of your audience. Just standing and talking at the front may not hold their attention. Think about what kind of presentation you would like to hear.

Criteria

Content

- familiar with topic
- shows understanding of what presenting
